

Kind to clothes, kind to the environment

Our UltraWash programme is the ideal balance of care and energy efficiency for your mixed loads - in a 59min cycle. Efficient low temperature washing protects your clothes. By washing at 30°C, you save 30% energy compared to a 40°C cotton programme. Kind to your clothes, kind to the environment.

Product Benefits & Features

59 minutes to perfect care with the UltraWash programme

Our UltraWash programme offers great cleaning performance and improved care for your daily loads, all in under one hour. Less energy consumed by perfect cleaning at lower temperatures, made possible by our pre-mixing technology. Preserving the quality of your clothes for longer.

- Anti-flood protection
- Child lock
- Anti-foam rinse system
- Washing Machine
- Accessory included for optimal use of liquid detergents
- Gentle Care drum
- Typ av plattform
- Out of balance control of the drum load
- Fuzzy Logic technology, adapting to the load
- Direct Spray washing system
- Maximum spin speed: 1600 rpm
- Silk program designed specifically for silk with gentle wash and adapted spin cycle
- SoftPlus option
- Steam programs
- Appliance HxWxD (mm): 847 X 597 X 636
- Washing capacity: 10 kg
- Feet
- 60 l / 0.75 kWh for standard programme
- Oko Mix, 10kg, A+++40%, 1600rpm, Permanent Magnet motor, 636mm / 658mm depth/max depth, Protex, Woolmark Green
- Washing programs
- TimeManager® with EcoInfo

UltraCare technology

UltraCare technology is a unique pre-mixing system that makes sure that all of the detergent and softener are quickly and fully dissolved in water outside the drum before touching the clothes leaving your clothes cleaner in shorter time.

Tailored washing means perfect results with SensiCare

Our SensiCare system automatically adjusts the programme's settings to suit the size of the load. Smart sensors reduce the time, water and energy used, meaning even small loads are washed with precision. For an effective clean without any risk of wear and tear.

Reduce wrinkles with SteamCare

Clothes emerge from the drum with less wrinkles thanks to our SteamCare system. By adding steam to the end of the wash, fibres are relaxed, and wrinkles are reduced by a third. Without being exposed to the heat of regular ironing, clothes look better for longer.

Fresh clothes with less water used, the possibility to add scent for a fresh smell

Enjoy that just-washed feeling with a fraction of the water. By refreshing your favourite clothes with steam, you can save over 40L of water per cycle, which will help to extend the lifetime of garments. And for an extra boost of freshness, just add fragrance.

Product Specification

Cord length (m)	1.8
Load Capacity kg (Wash)	10
Max. spin speed (rpm) (2010/30/EC)	1600
Motor system	Permanent Magnet
Net product weight (kg)	78.5
Main colour	White
Frequency (Hz)	50
Voltage (V)	220-240
Energy class	A+++
Total wattage (W)	2200
Panel color	White
Rated capacity in kg	10
Required Fuse	13
Dimensions WxDxH in mm	W597 x D636 x H847
Depth (mm)	130
Width (mm)	145
Installation type	Free-standing
